Details

Please see the [Team Project Guidelines \(https://canvas.iastate.edu/courses/128073/pages/project-guidelines\)](https://canvas.iastate.edu/courses/128073/pages/project-guidelines) for a full description and tips to complete successful projects.

Milestone #1 should be submitted as a **short video presentation**. The goal of this milestone is to help your group choose an appropriate dataset, define a clear direction for the project, and receive early feedback.

Milestone #1 should include:

- A brief description of the purpose of your analysis, including no more than three research questions related to your data.
- A clear description of the data source, including where the data came from and how the data can be accessed.
- One exploratory plot that is clearly related to one or more of your research questions.
- A short explanation of what the plot shows and why it is relevant to your project.

The presentation should use no more than 3 slides.

All group members must participate in the presentation.

The video presentation should be no longer than 5 minutes.

The presentation must be recorded using Canvas Studio. In your Canvas submission, provide the Canvas Studio link to the video recording.

Please submit only one entry for the group.

The Milestone #1 submission should include:

- The presentation slides.
- The Canvas Studio video link.

Data and R code are not required at this point.

Rubric for grading Milestone #1:

- Introduction

Clearly and concisely describes the project topic, explains why it is of interest, and states no more than three research questions. The introduction sets up a clear direction for the rest of the project.

- Data

Clearly and concisely describes the data source, the dataset, and the relevant variables. The source of the data is specific enough that someone else could locate the data.

- Research Questions

The research questions are clear, focused, and appropriate for the dataset. The questions are connected to statistical analysis methods covered or expected in the course.

- Exploratory Plot

The plot is relevant to at least one research question. The graph is carefully prepared for its purpose, with clear axis labels, an informative title or caption, and readable formatting.

Presentation Organization

The presentation is well organized and stays within the 3-slide limit. The best information is highlighted rather than showing everything. The flow from the data source to the research questions and exploratory plot is clear.

Video Presentation

The video is no longer than 5 minutes. All group members participate. The presentation is clear, concise, and easy to follow.

Text and Slides

The slide text is polished, concise, and clear. Slides avoid unnecessary text and do not include raw computer output. Grammar and spelling are carefully checked.

Submission

Only one group member submits the milestone. The submission includes both the slides and the Canvas Studio video link.

Keep in mind, this submission will count for everyone in your Project Groups group.
